TNT SAT**CANAL OVERSEAS LAUNCHES CARIBBEAN TNTSAT: FREE DIGITAL TELEVISION FOR ALL IN THE ANTILLES AND FRENCH GUIANA**

Because CANAL OVERSEAS believes that everyone should have a window on the world, the company is launching the CARIBBEAN TNTSAT offer through its CANALSAT CARAIBES subsidiary.

TNTSAT has been designed to provide free access to a cluster of channels and digital-quality radio stations for all homes in the Antilles and French Guiana.

The TNTSAT package features eleven channels and six digital-quality radio stations free of charge. It is available everywhere in the Antilles and French Guiana and does not require a subscription.

The TNTSAT offer is adapted to the specificities of the Antilles-French Guiana area and includes primarily public channels and the main local private channels, in conformity to the recommendations of the Conseil Supérieur de l'Audiovisuel (CSA, French audiovisual authority). This editorial choice also contributes to protecting cultural diversity and respecting local audiovisual balance.

The TNTSAT offer from CANALSAT CARAIBES stands out from other market offers thanks to 100% coverage of the territory by satellite: all homes can access it, whatever their location in the Antilles or French Guiana.

In order to make TNTSAT available to the broadest possible number, CANALSAT CARAIBES proposes an alternate rental solution to customers who do not already have the necessary equipment.

Concretely, the TNTSAT offer provides everyone with free access to a network package comprising RFO Guadeloupe, RFO Martinique, RFO French Guiana, Tempo, France O, La Une, ATV, ACG, LCP, TV5 Monde, uncoded CANAL+ and six digital-quality radio stations throughout the Antilles-French Guiana area.

CANAL OVERSEAS also indicates that, in conformity to CSA recommendations, the offer will evolve over time and will be enriched with new channels.
